Initial Settings of the App (iPhone)

Review the Terms of Use/Privacy Policy, and tap "Start".

Allow access to motion and fitness activities.

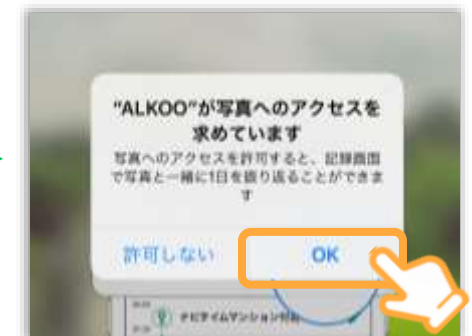

*If you do not allow it, you will not be able to get the step count information from your iPhone.

As for allowing location information, "Allow While Using App".

After completing the initial settings, **it is recommended to change ALKOO's location information to "Always" from the iPhone's settings.** (For details, see page 4)

Allow or deny access to photos.

If you allow it, it will display the photo together with the recording screen. It will only display the photo stored in the device.

If you want to receive notifications Select "Allow" to receive notifications.

Now, set a target number of steps!

You can set a target of at least 3,000 steps. You can change your target at any time, so please set it according to your own pace.

Settings Completed

When the home screen appears, the initial settings are complete.

About Location Information Settings

Location information will not be seen by others. If you are concerned about battery consumption, please turn off the GPS button on the home screen. (it will stop recording your movements). Please be aware that the number of steps will not be recorded properly if you do not allow the use of location information and put the app in task kill status.

*The display order of the dialogs may differ. Please be aware of this in advance.

Initial Settings of the App (Android)

Review the Terms of Use/Privacy Policy, and tap "Start".

Tap "Set".

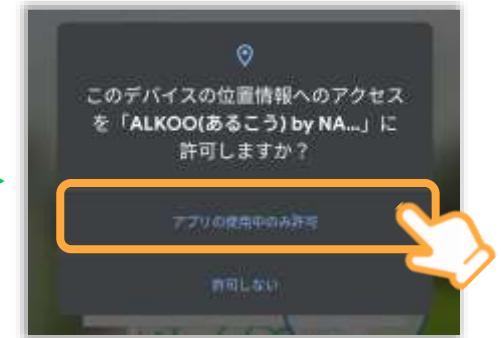

Allow the acquisition of exercise data.

*If you do not allow it, you will not be able to get the step count information from your phone.

For location information permission, please set it to "Allow only while using the application".

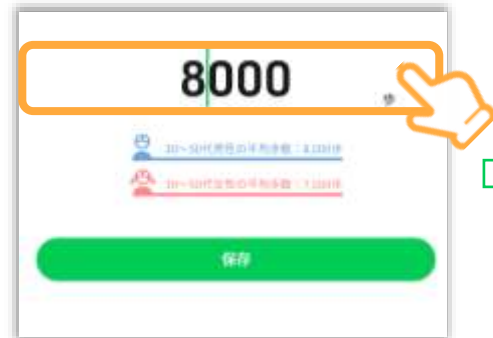

*It is only used to identify movement tracks and movements. Your location information will not be seen by anyone or be used to identify any individual.

Tap "Next".

Now, set a target number of steps!

You can set a target of at least 3,000 steps. You can change your target at any time, so please set it according to your own pace.

Settings Completed

When the home screen appears, the initial settings are complete.

About Location Information Settings

Your location information will not be seen by others. If you are concerned about battery consumption, please turn off the GPS button on the home screen. (it will stop recording your movements).

*Please note that what is displayed may change depending on the OS and app version. Please be aware of this in advance.

How to Set Location Information(iOS)
